- Type of incident:

Evacuation Procedures

Vapor materials - evacuate upwind from spill

Liquid spills - evacuate away from spill

Fire and/or explosion - evacuate away from site and upwind

- Relocate to designated area or to designated triage area.
- Keep exposed personnel separate from unexposed personnel for decontamination purposes.
- First responders will determine if the facility is able to be immediately occupied or if outside contractors will need to be utilized for the cleanup.
- Action Plan Team will be deployed in the event the structure is unable to be immediately occupied.
